

Neighborhood Listing Checklist

A quick way to turn rough photos and notes into safer, clearer sale listings. Use owner-confirmed facts only, and approve every post before it goes live.

Item	What To Capture	Why It Matters
Title	quantity, brand, color, material, size	helps neighbors scan fast
Condition	working, untested, scuffs, missing parts	keeps expectations honest
Dimensions	height, width, depth, seat height	prevents wasted pickup messages
Photos	front, side, close-up of wear, label/model	answers buyer questions early
Pickup	area, stairs/elevator, needs truck/help	keeps logistics clear
Price	single price, bundle price, flexible/not flexible	reduces back-and-forth

Owner-Approved Listing Formula

[Item + quantity] in **[condition]**. Good for **[simple use case]**. Notes: **[scuffs / missing parts / untested / pickup details]**. Price: **[\$ amount]**. Pickup only unless owner chooses otherwise.

Mini Batch Workflow

1. Send 3-5 rough items first. 2. Turn them into sample listing copy and a tracker. 3. Owner approves the voice and facts. 4. Quote the bigger batch before doing more. 5. Owner posts and handles all buyer contact.

Safety Boundaries

Do not handle payments, pickups, meetups, item possession, or buyer messages. Do not guarantee a sale. Do not make condition claims the owner has not confirmed.
